Allowance of the claims as literally worded is urged. Entry of the above added claims essentially precludes the independent claims from in any way being interpreted in the manner that might be inferred from the reasons for allowance. By virtue of claim 25, claim 20 cannot be interpreted to require that the lanthanum-containing dielectric layer consists of metal oxide. Similarly, new claims 60 and 61 preclude claim 52 from being interpreted as requiring the first dielectric layer or the second dielectric layer to consist of hafnium oxide or lanthanum oxide, respectively. Further, claim 62 precludes claim 3 from being interpreted as requiring the second dielectric layer to consist of metal oxide. If the Office enters the present amendment, then this file history is to be interpreted as if the Office's statement on reasons for allowance in the Notice of Allowability never existed or was withdrawn. If the Office disagrees with this just stated position, claim rejections are mandated or modification of the statements on reasons for allowance is warranted.

Respectfully submitted,
